# Draft Horses

Wash stalls ♦ Cross Ties ♦ Stall Kits

## Value Features

### Interlocking strength

Our Loktuff system provides strength and stability under any size horse. The interlocking will not separate as the animal moves around in the stall.

### Abrasion resistant

Our mats work with any type of horse shoes including kledated or borium, and are resistant to abrasions caused by pawing and swaying.

### Excellent traction guarantee

Our mats are guaranteed to give the traction required for foaling stalls, wash bays, and cross-ties. They are guaranteed not to roll, buckle or curl. All backed by an extended limited warranty.

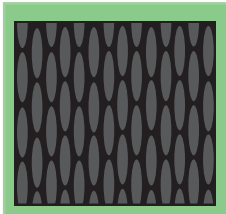

### Healthy safe environment

Our vulcanization process guarantees our product anti-fungal, anti-bacterial and non-porous providing your draft horse a safe comfortable environment to recover from a long day of service.

### Team of experts

Our team of experts, with more than 50 years of experience, continues to work on finding solutions to provide safety and protection for your draft horses. We are experts in customization.
